

# FAB

## Family and Business Learning

Family Advisory Behavioral Intelligence Platform  
Survey-driven Family Communication Analysis Dashboard

### Product Overview

---

FAB is a digital advisory support platform designed for family business ecosystems. Advisors use the platform to conduct structured behavioral and communication surveys within family-run organizations to assess interpersonal dynamics and governance patterns.

#### The Platform Enables

- Collection of structured survey data from family members
- Behavioral mapping across stakeholders
- Communication pattern analysis
- Advisory-led intervention planning
- Automated report generation (FFE and IFR)

#### Report Types

FFE (Family Functioning Evaluation): Evaluates overall family functioning patterns across the business unit.

IFR (Interpersonal Functioning Report): Analyzes interpersonal dynamics and communication patterns between individual family members.

#### Reports Provide Insights Into

- Family relationship dynamics
- Communication breakdowns
- Behavioral alignment/misalignment
- Governance conflicts
- Leadership influence patterns

#### Primary Goal

Enable advisors to identify communication gaps and behavioral misalignments within family business units and provide insight-driven intervention strategies using survey-based diagnostic reporting.

## Team Allocation

---

All listed members are actively contributing to FAB across development and reporting workflows.

- Yash
- Sakshi
- Rohit
- Siddhi
- Sagar
- Tanvi
- Esha
- Ria
- Sanika

## Sprint Context

---

**Sprint Name:** Pikachu  
**Start:** Ongoing  
**End:** 24 February 2026

### Sprint Objective

Enhancement and stabilization of reporting infrastructure including:

- FFE report generation pipeline
- IFR behavioral output formatting
- Survey result aggregation logic
- Advisor dashboard reporting views
- Report delivery performance optimization

### Focus Area

Survey -> Analysis -> Report Generation Lifecycle

## Current Sprint Status

---

**Blocked Tickets**

None currently blocked.

**Tickets At Risk**

No tickets are currently expected to miss the 24 Feb sprint deadline.

**Workload Observations**

Team is collectively aligned toward reporting module completion. No immediate resource bottlenecks identified.

**Recent Development Activity (Last 2-3 Days)**

- Improvements to report generation flow
- Backend optimizations for behavioral scoring
- UI-level updates for advisor report access
- Enhancements in survey data processing for FFE/IFR outputs

<b>Sprint Health:</b>	On Track
<b>Deadline Risk:</b>	Low
<b>System Stability:</b>	Moderate (reporting enhancements underway)
